CANDIDATE W. KUHL
DRAWS LARGE CROWD
 Kelly's Hall Well Filled Sat-
 urday Evg., when Seve-
 ral Speakers Gave
 Addresses.

A meeting in the interests
 of the social credit candidate
 in this Federal riding was held
 here Saturday Evg. Mrs. C.
 Wood, president of Edson-
 Jasper S.C. Association, occu-
 pied the chair, and in a few
 introductory remarks gave a
 sketch of the campaign to help
 elect a social credit candidate
 to the House of Commons.
 Mr. W. E. Hayes, Assembly
 man elect, gave a short ad-
 dress, in which he thanked in
 a very hearty manner all who
 had helped elect him in the
 recent campaign, and pledged
 himself to give his best in
 every way possible to his con-
 stituents.

Following Mr. Hayes, the
 chairman introduced the candidate,
 Mr. Kuhl. Mr. Kuhl was enthusias-
 tically received by the good-sized
 crowd which now filled the hall,
 and which listened very attentively
 to him as he explained the social
 credit doctrine in connection with
 the adaptation to affairs in the
 Federal political arena. He intimated
 that his health at the present time
 was not at the best, as he still
 seemed to be suffering from the
 effects of the arduous campaign in
 which he had recently participated,
 and which had resulted in the
 election of Mr. Baker as Assembly-
 man from Jasper-Ber. Constitu-
 ency. On referring frequently to
 his notes, Mr. Kuhl gave a very
 comprehensive review of the work
 which was ahead of the 17 social
 credit members which Alberta was
 to elect on the 14th. He urged all
 present to make an earnest endea-
 vor both by their influence and
 vote to put the social credit can-
 didates at the head of the poll, as he
 intimated that a great deal de-
 pended on the influence which their
 Federal members could bring to
 bear on the government which
 would then be in power at Ottawa.
 Assemblyman-elect F. M. Baker
 gave a short talk, in which he
 stated his pleasure in meeting so
 many old friends. Mr. Baker had
 formerly been in business at Spruce
 Grove.

Mr. Kuhl spoke at Winterburn
 hall on Monday night; Entwistle
 on Tuesday; Wildwood on Wednes-
 day; Carrot Creek, Thursday; and
 then on to other points on the way
 to Edson and Jasper.

CCF. Meeting, Oct. 12.
 Mr. Geo. Bevington and his Co-
 operative Commonwealth Federa-
 tion Party will keep their promise
 to pay Stony Plain a return visit.
 This will occur on Saturday, Oct.
 12 in Kelly's Hall. Mr. Bevington
 is the CCF candidate in this, the
 Edson-Jasper Riding, and has an
 important message to deliver to
 the electors in this riding, in view
 of the near approach of polling
 day, Monday, Oct. 14. A well-
 filled hall should greet this well-
 known authority on banking and
 economics.

'SALADA' TEA

Controlling The Rust Menace

Very little reflection is required to demonstrate that an expenditure of ten years' intensive work by trained scientists and \$600,000 of coin of the realm is a low price to pay for insurance of Western Canada's future wheat crops against the appalling loss which a few days of rust infestation can levy against the farmers of the West.

The \$600,000 referred to and the ten years spent in work in the laboratory and the field, it was recently announced, is the cost to the nation to date of producing an un-named wheat which, according to authorities, is able to withstand a rust epidemic unscathed and at the same time produce a kernel with all the desirable attributes of the best commercial varieties of bread wheat.

Coupled with this announcement was the further statement that this new wheat can be multiplied to a sufficient extent at Dominion government experimental farms and on private lands under government supervision to enable a general distribution of seed to be made to the farmers of the west in 1937.

These announcements were accompanied by a further declaration of considerable importance, namely, that the government intends to retain control of the source of supply of this valuable seed and to see to it that the farmers are not exploited by private concerns in connection with its distribution.

The statement means that the farmers of Western Canada will be able to secure in two years time a substantial supply of seed wheat that is guaranteed to enable them to grow a crop completely immune from ravages by rust, and at a reasonable price, probably at cost.

It is perhaps a coincidence that these announcements were made at a time when Western Canadian wheat crops were hit by the worst infection of rust that the west has known in history but the information should put new heart into the many thousands of farmers who this summer saw their hopes of recovery blighted when millions of rust spores descended on the most promising crop in years and slaughtered yield and grade which meant reducing price to the vanishing point.

The news given in these important announcements may well mean that 1935 will be the last time that Western Canadian farmers have to suffer tremendous loss from rust infestation. This statement is made with caution, however, for although it is not usual for severe rust infestation to follow in successive years, it cannot be stated affirmatively that it will not occur again before sufficient of the new wheat is grown to make a repetition of the 1935 calamity an impossibility.

Results of the work that has been done during the ten years' quest for a rust resistant wheat and laboratory and field trials of the strains which have been produced, however, appear to indicate that the battle against rust has been won by the scientist and agronomist.

There is additional comfort for the farmer, however, in another coincident announcement and that is that some of the five strains of rust resistant wheat which are being increased this year also show a tendency to resist other diseases, those mentioned specifically being striking smut, leaf rust and one of the varieties is reported as "moderately resistant" to loose smut.

So that it is possible that while the experts have won their fight against rust they have at the same time scored at least partial victory in the battle against some of the other diseases to which wheat is heir. To what extent these other disease pests have been overcome while the major conflict was being waged time and experiment alone will prove. It is safe to say, however, that these apparent advantages will be followed up with the same vigor that these scientists have shown in their now successful efforts to overcome the major enemy.

Definite proof that the new wheat is all that is claimed for it exists as a result of field trials and laboratory tests which have been made during the ten years the work has been in progress and particularly this season.

In field plots the new wheat showed up clean and bright while alongside it the other standard varieties of commercial wheat were sick with the disease. Laboratory and commercial tests have proven conclusively that the new wheat has milling and baking qualities equal to that of Marquis and Hereward.

The tests have demonstrated equally conclusively that the new wheat has the requisite length and strength of straw, yield, earliness, appearance of kernel and weight per bushel possessed by the best of the present day commercial varieties.

In other words the new wheat fills all the requirements of the type of hard spring wheat which has made Western Canada famous in the world's bread markets and has the additional ability to withstand rust, and perhaps to withstand some of the other diseases which periodically take toll of the Western grain farmer.

Eighty per cent. of the new radios in England were bought on time. Ninety per cent. of the world's nickel supply is produced by Canada.

Empress Of Ethiopia

Claims She Is Descendant Of Queen Of Sheba

Through all the worries and anxieties brought upon him by Italy's threatened conquest of Ethiopia, Emperor Haile Selassie's most devoted companion and counsellor has been his wife, Empress Walzeru Mennen. Gifted with uncommon intelligence, astuteness and foresight, the 41-year-old Empress urged the Emperor not to yield to Mussolini's threats but to defend the kingdom to the last.

Emperor Haile Selassie is Walzeru's fourth husband. Maybe that is why she is called the "Queen of Kings." They have three sons and three daughters. They have been married 23 years, and it is said they have never had a quarrel. The Emperor like most of the higher-caste Ethiopians, is monogamous. Walzeru is his only wife.

"Walzeru" means literally "Lady of Quality."—She is the daughter of a famous provincial prince, and has a very dignified and aristocratic bearing. She was educated by private tutors. The "Queen of Kings," who is fat, not fair, and 40, claims to come from the same Hamitic stock as the famous Queen of Sheba who ruled Ethiopia 3,000 years ago. She also claims descent from the glamorous Cleopatra. She is addressed by her ten million native subjects as "Your Serene and All-Just Majesty." She signs herself "the Conquering Lion of Judah hath conquered."

The Empress speaks no language except the ancient Amharic, which is of Semitic origin. All attendants who approach her shield their mouths with their white shamma (shawl).

Dionne Quintuplets Bowl

Smartly Designed Bowl Is Offered As A Gift

A surprise gift offer which will interest every parent, every child and, in fact, everyone who has ever heard of the world-famous Dionne Quintuplets, has been announced. The article offered is a cereal bowl created in honour of the five little sisters and called the Dionne Quintuplets Birthday Bowl. Made of shining lustrous chrome, it is six inches in diameter, smartly designed in modern lines, and embossed inside with a charming sculpture of the "Quints." On the rim are engraved the names of the babies—Eunice, Annette, Marie, Yvonne, and Cecile. Besides being an ideal cereal bowl for a child, it makes a distinctive olive and celery dish or bon-bon dish.

Readers can obtain this delightful gift by sending two Quaker Oats trade-cards, plus fifteen cents to help cover postage and handling charges, to The Quaker Oats Company, Saskatoon, Sask.

Heaviest Air Passenger

United Air Lines Carried Judge Who Weighed 400 Pounds

When County Judge A. W. Dulworth applied for a ticket at the United Air Lines office at Omaha the booking clerk was in a quandary. The judge weighs four hundred pounds and is probably the heaviest in the world. The clerk did not wish to offend him, but at the same time wondered if he could book him on board an aeroplane on only one ticket. The company were pleased to take him without extra charge, however, as the judge was undoubtedly the biggest passenger they had ever carried, and they wished to mark the occasion.

A Strange City

Queer Place In Derbyshire, England Has Only Eight Houses

A strange city may be found in England within two miles of Chesterfield's famous crooked spire. It is another Derbyshire curiosity. Down a winding bridle-path is Tupton City—the queerest and smallest city in the world. It has only eight houses and 26 inhabitants. It is the city of nothing, for there is no church, no chapel, public-house, no shop, no post office. No electricity or gas is found there—they use oil lamps. How or why it became a city nobody knows, but it is believed to have been founded on the ashes of a Roman camp.

Soviet Aviation Authorities Try Out Parachute Kite

A passenger and freight-carrying "parachute kite," which Soviet aviation authorities said they believed would be able to ascend into the stratosphere, had its first successful trial lifting four tons of cargo.

An ordinary freight parachute, with a dome 65 feet in diameter, was used. The load was attached with short ropes leading from one side of the parachute. The other side bulges upward, giving the lifting power. Longer ropes, running from the bulging side, also were attached to a load which, for passenger-carrying purposes, would consist of a gondola. By maneuvering the longer rope, crew, experts said, could steer the parachute and control its ascent and descent.

The whole combination load was called a "parachute train" in the official description by Prof. I. Gromkhoffsky, chief of the experimental institute of the Commissariat of Heavy Industry which is sponsoring the trials. Gromkhoffsky said he believed the parachute could carry explorers into the stratosphere and descend safely in a parachute kite as the safest mode of air travel since the parachute is always open, assuring a safe descent.

Transmits Sound And Vision

Television In Germany Covers Distance Of Nearly 50 Miles

A great advance in television service has been achieved by a transmission from Witzleben to Gildenhall, Germany, a distance of nearly 50 miles. The transmission, both for sound and vision, is stated to have been very good. Dr. M. Hadamowski, head of the German broadcasting service, was seen and heard by the men of the labor camp at Gildenhall, whom he addressed. Afterwards, news pictures were transmitted with results reported to be equally satisfactory.

Only Four Feet Wide

Philadelphia Is To Have Narrowest Building In U.S.

A building being erected at Philadelphia, Pennsylvania, will, it is believed, be the narrowest in the United States. It will be only four feet wide. The site of the building is all that is left of a corner plot from which the city sliced most of the ground in order to widen a street. The new building will be constructed of stainless steel, and half of it will contain a restaurant which will have a front which can be removed in summer.

The possibility of travelling to the moon, by means of "a flying chariot" was discussed by a scientific-minded bishop in England in the seventeenth century.

New Name Sought

Scores of letters have been received by J. R. Macdonald, Stipendiary Magistrate of Hull, England, offering alternatives to the world "dole," for which he offered a prize of \$250. So far not one suggestion is regarded as good enough for the award. One writer sent a list of 65 alternatives.

Problems Of Production Studied Under Prairie Rehabilitation Program

An important and very practical phase of the Prairie Farm Rehabilitation programme centres around the intense studying of the farm problems of production resulting from drought and soil drifting, also around the demonstrating of the most successful precautionary and controlling measures. As a medium for carrying on this work, the Prairie Farm Rehabilitation Act provides for the establishment of District Experiment Sub-Stations. These sub-stations are located in problem areas, principally in the south and central portions of the three Prairie Provinces, where hardships and financial loss have resulted from varying hazards to crops, community wide in their extent. Up to the present time thirty-nine district experiment sub-stations have been established on varying soil types, and an active programme of work has been instituted. As a broad objective the programme aims to develop a system of farming with as high a degree of permanency as may be possible, a system that may be adaptable to farming areas where grain farming is principally being followed, with little rainfall and on soils subject to drifting.

The system of cropping is based primarily on strip farming with its accompanying necessary cultural practices and short crop rotations. The two-year rotation of fallow, wheat, alternating with hay, is being followed. The cereal crop is being widely laid down, although in certain sections where the annual precipitation warrants such a procedure, a three year cropping system of two crops of grain after fallow is being followed. The cereal crop being grown on these short rotations varies in keeping with the individual need and aims to produce wheat primarily as the cash crop, at the same time to grow oats and other cereals as forage, thus building up feed reserves as an assurance against the possibility of recurring short crop years and the resulting winter feed shortage which is frequently experienced. The width of strips vary from eight to sixteen rods, depending on the soil type and its past history with respect to soil drifting or wind erosion. The effect of cover crops and the use of manures and chemical fertilizers is also under experimentation and study as to their effect on controlling soil drifting.

The development of farm home shelter belts to protect the farm buildings, farm home and to give shelter to stock around the paddocks, is under way. Definite plans have been made and land summer fallow of this season as may be required in keeping with the programme to make it possible next spring to set out tree plantations and shelter belts on farms operating as district experiment sub-stations, where they do not now exist, will also be required to present shelter belts as may be advisable. The farm garden, as a source of supply of vegetables for the family during the summer and winter is being provided for in the layout and is being enclosed in the shelter belt adjoining the buildings. The garden area is being divided into two sections so that each year cropping will take place on summer fallow land. A sufficiently large area is being set aside for this purpose to make the use of horse equipment as possible as a labour saving procedure in farm gardening.

To provide adequate pasturage for stock livestock as may be kept, including horses for farm use, a permanent grass paddock adjoining the buildings and protected by a tree shelter comes within the programme of work. In many cases where such do not already exist, land has already been seeded to provide this pasture, using Crested wheat grass or Bromus grass as the foundation when seeding down. As a supplement to the permanent pasture, as the season advances and growth becomes slower, provision is being made for supplementary pastures, and an area is being seeded down to fescue as well as to spring grass.

In the study of drought and soil drifting problems on sub-stations, very special attention is being given to the methods of handling the sum-

merfallow. Tillage practices being directed to permit a large surface and to retain as large a portion as possible of stubble and other forms of vegetation on the surface.

In the organization of a sub-station, the land is not purchased but rather a co-operative agreement is entered into with a progressive and interested farmer in these different districts. In consideration of an annual rental for land use, this farmer undertakes to provide the necessary labour and equipment to carry out the work under the direction of a supervisor representing the Dominion Department of Agriculture. To be effective in studying such a problem as that of soil drifting, a fair sized unit is necessary and for such an area up to 640 acres is that utilized in sub-station work. The district experiment sub-station is a community developed organization and aims to study and work with farmers in these districts for their mutual benefit so that sound practices and those most likely to succeed under such conditions may become general in the application of the problem.

District Field Days have been held this year on these sub-stations at which time the station operator and representative of the Dominion Department of Agriculture reviewed the work under way and results being obtained. The extent and direct importance of the problem under consideration has been evident from the group of from 100 to 350 farmers who have assembled to discuss with one another and study their local community problems.

The work in connection with the District Experimental Sub-Stations is being directed by John C. Moynan, chief supervisor of Illustration Stations, Dominion Experimental Farms.

Salt In Road Construction

New Type Of Surfacing Is Called Soil Concrete

The speed record of Sir Malcolm Campbell, made on the salt surface of the Bonneville flats in Utah has called attention to the use of salt in road building, and particularly to research work in this connection by a Canadian, in Nova Scotia eight years ago. Roads, embodying principles outlined by A. R. Chambers of New Glasgow, N.S., have been built in the United States and have been found to stand up against the ravages of weather and traffic, despite the inexpensiveness of building costs and maintenance. Roads of this type are also being built in Ontario, particularly in Lambton and Simcoe counties.

Early this year, the United States government announced the appointment of a committee to work under the direction of the Highway Research Board and to study the application of common salt as a stabilizing chemical for use in clay-gravel roads.

Seeking a solution to the dust problem of Nova Scotia's highways, Mr. Chambers constructed short stretches of roadway at Truro and Elmfield, Mr. Chambers' road-building projects attracted highway experts from the state of Michigan; who, hearing of the Canadian experiment, journeyed to Nova Scotia, inspected the highway built by Chambers and returned home to conduct further research into the value and practicability of all the salt-clay combination. To-day, an entirely new type of road surfacing has been developed and is known as soil concrete.

Market For Live Hock

Between Aug. 1 and Sept. 5 there were 1,163 head of stock and feeder cattle moved from Edmonton to the Ontario market. The United States market also opened for hogs from the Edmonton area, 489 going to Spokane and 137 to St. Paul, beside 88 cattle to the latter market, in the period given.

Bels have their scales inside their skins. Their slipperness is a valuable asset to them in escaping from their enemies, and is due to a highly polished skin which exudes a sticky mucus.

Ducks Need Some Shelter

Will Not Thrive If Protection Not Given At Night

There is a fairly common impression that ducks require no shelter. This is quite correct so far as running about during the day is concerned, except in hottest summer; but they never thrive properly without some shelter at night. It need not be elaborate, nor large enough for them all to promenade in it all night. It is unlikely that many will stay in it at a time. They like to be outside, and get to be able to seek shelter occasionally, and the shelter must be perfectly dry.

Unless the house is made on sloping ground the easiest way to keep it dry is to fill it with six inches of earth and to dig a little drain around it. Put three to six inches of straw on the floor, and the ducks will be warm and dry as soon as they enter. Five feet is high enough, for the pen with three sides perfectly wind-proof, and the fourth partly closed.

Would Abandon Branch Lines

Makes Application For Closing Lines In Manitoba And B.C.

Applications for leave to abandon two branch lines in Manitoba and one in British Columbia, operated by its subsidiaries, have been filed by representatives of the Great Northern Railway in Winnipeg with the board of railway commissioners.

In Manitoba, the applications seek abandonment of lines running from Brandon to the international boundary and from Morden to the international boundary, operated by the Brandon, Saskatchewan and Hudson Bay Railway.

In British Columbia, leave to abandon the line from Princeton to the international boundary, operated by the Vancouver, Victoria and Eastern Railway, is sought.

The skeleton of a giant Irishman, seven feet, seven inches tall, is one of the remarkable specimens in the College of Surgeons, London.

Social Hygiene Council Undertakes To Organize Health League Of Canada

Grasshopper Invasions

Matter Is Discussed At Imperial Entomological Conference

Best methods of dealing with locust and grasshopper invasions was discussed by the fourth Imperial Entomological conference in London.

H. G. Crawford, of the entomological branch of the federal department of agriculture at Ottawa, declared the total area of North America infested with grasshoppers in varying degrees this year was 80,000,000 acres.

The loss last year had been reduced considerably following the campaign in Saskatchewan, the Canadian delegate added.

Dr. A. E. Cameron, of Scotland, suggested the outbreak of the grasshopper plague in Canada might prove a blessing in disguise "since the Dominion has already produced more grain than can be distributed."

New Army Blimp

United States Machine Pronounced A Success After Tests

The United States Army tested its huge TC14, described as the largest non-rigid airship in the world, and pronounced it "very successful." For two hours the giant blimp, with overall dimensions of 225 by 54 feet and manned by a crew of nine, cruised over Scott Field, Ill., for the benefit of ground observers. The ship is estimated to have an altitude possibility of 10,000 feet. The blimp is powered by three air-cooled engines capable of developing a speed of 90 miles an hour.

Confucius lived to be about 72 years old, living from 550 to 478 B.C.

The SNAPSHOT GUILD

IT'S FAIR TIME

Left—"The Country Fair or bust." Right—Even the side-show offers snaphooting opportunities.

Let's forget about the horse, the seashore, the woods and pictures of the children and to-day think about picture making opportunities at the county fair.

September is fair time and I'll wager that mighty few of you have ever given any thought to this sort of snaphooting. Right? Honestly the county fair offers more possibilities for snaphooting than space will permit telling about. Can't you see the bankers in front of the side-show extolling in husky, loud voices the merits of their shows? There's the side-show band with its battered instruments letting forth loud blasts of discordant music; the not so clean looking vendors of dolls, trinkets, gauds, balloons and various other things of questionable value; every one of them a subject for good human interest pictures.

But let's look toward the more serious side of the fair—the exhibits. For instance, by making intelligent use of your camera, you can take home with you not only pictures of general interest but if you are particularly interested in farm products you can snap record pictures that may later prove invaluable. There is the judging of cattle, sheep, horses and hogs, for instance. If the judging is done in an open-air ring you can snap the picture of the winner of the blue ribbon prize with any camera—big type or folding.

In taking such pictures, or any pictures, as far as that is concerned, don't just look in the finder and snap

the first thing you see. If the animal being judged has any unusual markings manage to get to a place near the ring where these markings show up the best in your finder. Try too to avoid unattractive backgrounds such as telephone poles, wires or sheds.

Among the innumerable picture possibilities at the fair you will surely want to take some action pictures and a fair isn't complete without the thrill of horse racing whether they feature the veteran driver proudly seated in his sulky or the young, dare-devil jockey.

Snap a picture of the start of the race as the drivers or jockeys maneuver their horses to the barrier or starting post and by all means take your position at the end of the track as the horses dash perilously around the curve and into the "home stretch."

Remember this, however. If you do not have a camera with a very fast shutter, say one that will operate at 1/500 of a second or faster, don't try to snap a rapidly moving object as it whizzes directly across the lens of the camera or direct line of vision. Your chance of getting a good, sharp picture are much greater if you catch your subject at an angle of about 45 degrees. It's always better to play safe than to take a chance and perhaps get a blurred picture. Load your camera with film to-day and be ready for that eventful day when you are "in the fair!"

JOHN VAN GUILDER

By reason of many suggestions coming from all parts of Canada and because of the ever increasing need of some voluntary organization, capable of spreading knowledge regarding preventable illness, the Canadian Social Hygiene Council has undertaken the responsibility of organizing the Health League of Canada.

By this action the officers and directors will be enabled to greatly enlarge the scope and activities of the present organization and make more concrete contributions to the cause of public health and preventive medicine than in the past. It is felt by the National Board and by members generally throughout Canada that the step is in accord with the growing realization of the importance of health as a Dominion and indeed an international issue.

The Health League of Canada will undertake a continuous programme of educating in the means of preventing illness and prolonging life and the need for governmental and private action to this end, using the press, the radio, the pamphlet and the public speaker as a means of transmitting this information to the public. Widespread support of this new development is already assured by communications from departments of health, educationalists, service clubs, churches and religious leaders throughout Canada.

The Honourable Mr. Justice Riddell, distinguished jurist, member of the Supreme Court of Ontario and internationally known as a writer and speaker, has been president of the Canadian Social Hygiene Council for the fifteen years of its existence. He now becomes president of the new organization.

"The solution of health problems rests in the development of a co-ordinated health programme under Dominion leadership," Dr. Bates says, "and the Health League of Canada proposes to aggressively work toward this end."

It is understood, of course, that leadership means nothing more than the term implies, nor is it associated that there should be any change in the responsibility or the relationship of the Dominion and Provincial Departments of Health. It is desired at this time only to emphasize the importance of health as a national issue and the desirability of co-operation on the part of all to the effect that illness rates may be cut to an absolute minimum.

The Island Of Raseay

Was Once Owned By Governor Of Beattie Prince Charles

The suggestion made in the British House of Commons the other day that the Ministry of Agriculture surrender to the Ministry of War the 28-square-mile island of Raseay, one mile northeast of Skye, Scotland, for a British Heligoland, has revived a couple of reminiscences of the forgotten island. Dr. Samuel Johnson and Boswell visited Raseay in 1773. The room and bed in which Johnson slept can still be seen. The travelers had a rough crossing. "This," said Dr. Johnson, safely landed on Raseay with only the loss of his apurs, "is now the Atlantic. If I should tell at a tea table in London that I had crossed the Atlantic in an open boat, how they'd shudder, and what a fool they'd think me to expose myself to such a danger." A McLeod of Raseay, before he followed Prince Charles in 1745, took the precaution of making over the island to his son. After the rebellion he hid in an underground cave. His son, claiming the property, swore that his father was below ground, and that he had walked over him.

Prefer Being In Jail

The 1,200 inmates of Canton's first prison, 200 of whom are women, "are better off in the prison than they would be outside working as laborers or than they would be as peasants living on farms." This is the finding of a committee of Chinese newspapermen who have investigated the first prison. The committee finds that the prisoners dislike the idea of freedom.

WORLD HAPPENINGS BRIEFLY TOLD

Convicted from fingerprints on a mirror that had stolen, three middle-aged men were sentenced at Bombay to imprisonment of from one to three years.

Ontario department of education has ordered compulsory teaching of civics in all public and high schools in the province, starting in October. A new text book will be ready soon.

Business is better all over Canada and the morale of the west is improved, Robert O. McCulloch of Galt, Ont., president of the Mutual Life Assurance Company of Canada, said in an interview in Victoria.

A peat the size of a pigeon's egg and said to be capable of protecting its wearer from all danger was part of the loot recently taken from the tomb of a Manchu prince near Peiping by grave robbers.

Lady Byng of Vimy, widow of the former commander of the Canadian Corps, Lord Byng, who died last June, has informed Dominion headquarters of the Canadian Legion she will take part in the Vimy pilgrimage in July next year.

Successful use of an instrument which bores through the brain to the skull pan and burns away tissues producing a fluid that causes hydrocephalus, a condition causing infants to become idiots, is announced by Dr. Tracy J. Putnam, of Boston Children's hospital.

Nearly \$7,000,000 of new ordinary life insurance, a slight increase as compared with the same month last year, was sold in Canada and Newfoundland in August according to returns of the Life Insurance Sales Research Bureau, Toronto. Of the total, sales in Saskatchewan were \$996,000.

England To Receive Relic

Armada Jewel Has Been Given To Art Collection Fund

The Armada jewel, one of the most beautiful relics of Queen Elizabeth's time, is to return to Britain. It was bought at a store in London for 2,700 guineas, and it was announced that it had been given by Lord Wakefield to the National Art Collection Fund. The jewel formed part of the Pierpont Morgan collection of miniatures. It will go to the Victoria and Albert Museum, Kensington, London.

D. E. Warford, of Sawtelle, Calif., lays claim to being the most tattooed man in America.

IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with windows or saddle bells, or even have a side-saddle, the thing to do is get the Minard's outfit at once, as Mr. David of Glenora, Manitoba, knows, he writes:

"I like your Minard's outfit. Like to have it in the house. I have found your Minard's outfit especially good for horse and rider on horse."

A family doctor prepared Minard's outfit over 80 years ago. Still available in every stable and every house.

Grows Huge Grape Vine

German Boy Planted Hiding Switch Left By Customer

Thirty-five years ago a Dr. Dick of Diamond Creek, Victoria, was out riding near Heidelberg, Germany. He left his riding switch behind at a smithy's where he was having his pony shod. The smithy's had recognized the switch as a grape vine cutting. He planted it in his cottage. Now it has grown to a full vine 35 yards long extending over the fence across a line and along the eastern wall of a hotel.

Liner Gangway Blocked

Passengers At Southampton Held Up By Thousands Of Bees

Thousands of bees held up passengers about to embark on the liner *Mohavia* at Southampton, England. The bees settled down comfortably at the foot of the passenger gangway and defied attempts to move them. A hose was tried, but this merely incited the bees, and caused them to buzz in clouds, scattering onlookers. Eventually order was restored, and embarkation proceeded.

HARVESTING IN SASKATCHEWAN AT 20 BELOW!

Just about the middle of December, one of the most unique and interesting annual harvests to be garnered on the North American Continent will be in full swing. Not wheat—no! Not wheat—but Little Manitou Lake. The scene will be Little Manitou Lake, Watrous, Saskatchewan. The harvesters will be the employees of the Department of Natural Resources of Saskatchewan; and the harvest itself will consist of the tiny crystals of mineral salt which form in Little Manitou Lake each year at "freeze-up." It is one of the essential conditions that the harvest, he completed within a period of ten days. When the Prairie

winter comes in real earnest, and the thermometer shivers down to 20 below zero, the Departmental men, warmly attired, and wearing waist-high rubber boots, gather up their shovels, and store them in the Government warehouse at Watrous, from where they are later distributed. The medicinal qualities of the salt lake, known for many years, are becoming more and more widely recognized, and as a consequence, the harvesting operations are assuming ever-increasing proportions, and the Lake is proving to be one of the Province's most important natural resources.

Crochet
Your Gay
Scraps of
Wool
Into an
Afghan
Persian
Garban

PATTERN 5439

Even though you have nothing on hand but tiny scraps of wool, you can fashion this lovely afghan. And the wool may be of different weights. Each block—4½ inches square—can be done in different colors. And what a jeweled effect you have when done! It does indeed look like a colorful oriental tapestry. Doing each block in different colors, too, makes the work more fascinating for each is an adventure. Besides an afghan you can make lovely pillow tops or chair sets. Can't you see what a lovely and inexpensive Xmas gift these would be?

In pattern 5439 you will find complete instructions for making the afghan shown as well as pillow tops and chair sets; an illustration of the block and of the stitches needed; newspaper requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 475 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

To Shorten Ocean Trip

Irish Free State Plans Ship-to-Shore Planes

London will be brought within three days of New York when civil aviation plans which are being devised by the government of the Irish Free State come into operation—possibly next year.

The scheme aims at a service of high-speed aircraft of the Douglas type, to intercept the big Atlantic liners off the west coast of Ireland and to speed the passengers to London, with the saving of a full day of travel time.

With ships of the type of the Queen Mary and Normandie the Anglo-Irish air ferry will make London and New York a matter of a mere weekend trip.

From Galway on the west coast of Ireland to Southampton by liner is at present a full day's journey, with an additional two hours to London. The new air link would bring Galway within three hours of London.

It is proposed to use amphibian machines. From Dublin the idea is to form a new air link not only with London but also with Paris, Brussels, and Berlin.

Alberta's Coal Reserves

Alberta's coal reserves total 40,200,000,000 tons and lie buried in 1,717 square miles of provincial soil, Sir Montague Barlow, one-man commission investigating collieries, was told. Dr. J. A. Allan, head of the geology department, University of Alberta, explained Alberta's topography and geological formation.

A recent check showed that only 25 of the 1,100 Gideon Bibles placed in one Detroit hotel in 1928 remain in their rooms.

SUNDAY SCHOOL LESSON

OCTOBER 13

THE STORY OF JEREMIAH

Golden text: To whomsoever I shall send and thou shalt go, and whatsoever I shall command thee thou shalt speak. Jeremiah 1:7.

Lesson: Jeremiah 1:1-10; 6:10-11; 8:18; 26:1-24; Chapters 38, 37, 38.

Devotional Reading: Psalm 26:1-7.

Explanations And Comments

Conversions. Speaking Enjoined, Jeremiah 1:6-10. In the thirteenth year of Josiah's reign (about 626 B.C.), Jeremiah, the son of a priest, became conscious of a divine call to the prophetic office. It is natural to understand that he had long meditated upon his country's sins and had felt impelled to denounce them, but was most reluctant to undertake the task. The inward struggle which took place in his sensitive and shrinking heart when something different from his ordinary consciousness made him certain that he was destined to be the prophet of woe, he tells in the form of a dialogue between God and himself.

"Ah, Lord Jehovah! behold I know not how to speak; for I am a child. He was not a child in years but he lacked experience, he feared he had not the ability to speak, he distrusted himself. In the jargon of to-day, he had an inferiority complex. "Say not, I am a child" was the answer to his troubled thoughts that came to him: "For to whomsoever I shall send thee thou shalt go, and whatsoever I shall command thee thou shalt speak. Be not afraid because of them; for I am with thee to deliver thee."

The commission which Jeremiah received was to "over the nations and over the kingdoms, to pluck up and to break down, and to destroy and to overthrow, to build and to plant." His task was to be destructive and constructive. He must strive to make the people give up their vices and weaknesses which were making for internal corruption and for political destruction, and to implant in their hearts new ideals of righteousness.

The Courageous Speaker Threatened. Jeremiah 28:1-11. During the 40 years of Jeremiah's ministry, his was the task of setting himself in opposition to all the currents of his time, for Judah believed that she would escape the impending doom, that Jerusalem was inviolable because it held the temple, that the nation could not perish. Jeremiah had to warn her that her only possible course was to surrender to Babylon. At some great feat, doubtless when the people were gathered at Jerusalem, Jeremiah uttered the warning recorded in the first seven verses of chapter 28.

The Courage of Convictions. 28:12-15. Jeremiah's defense was that his message had come to him from God, and he urged them to amend their ways and doings, and to obey the voice of Jehovah. If they would do this, Jehovah would avert the evil which he had pronounced upon them. Prophecy, then, was regarded as conditional; a change of conduct could prevent the threatened punishment.

Busy Year For Sun

More Eclipses In 1935 Than For Past 150 Years

The sun this year presents its greatest show of eclipses for the past 150 years. The moon will have passed between the sun and the earth no fewer than five times, and the moon will be in the earth's shadow twice. This according to Professor Alfred H. Joy, secretary of the Mount Wilson Observatory, is the greatest number of eclipses possible in one year. Not since 1805 have the sun's rays been obscured so often, states Reuter's correspondent in Pasadena. It will be the only second time since 1255 that there have been five solar eclipses in one year, and there will not be another such number until the year 2485.

Making Ten-Year Tour

Bicyclists From Sumatra Do Not Believe In Speed

Two Sumatran cyclists who do not believe in the modern craze for speed have arrived at Bombay on a ten-year tour of the world. They started from their home in Sumatra in July, 1924, and have taken over three-and-a-half years to complete 5,000 miles on their bicycles. They made fairly long stops in Indo-China, Siam and Burma and in various parts of India in order to learn the language and study the people and their religion.

By 1936, the United States public debt is expected to total \$34,258,000,000; approximately \$270 for every man, woman and child in the country.

Soviet scientists are building a telescope which will have the third largest lens in the world. 2318

Out Of Politics

Henry Ford said in an interview published in The Detroit News that he is not interested in any "Ford for president" boom, or in politics generally. Discussing the business outlook, the motor magnate said: "I am not a prophet but I have the feeling that business and wage trends will be up, and I do not believe the political campaign of next year will have any appreciable effect on business, one way or the other."

A SAFE

URGE LARGE SCALE EMIGRATION PLAN TO THE DOMINIONS

Newcastle-On-Tyne, England.—The conference on emigration to the empire, concluded after preparing a written case for a government-assisted emigration scheme.

The brief, which a deputation will present to the government, urges a large-scale emigration scheme would help solve unemployment at home and abroad. Financial assistance would be repaid by saving unemployment relief.

Establishment of an empire development and emigration board with statutory powers is advocated and it is suggested the annual budget should provide grants to settlers.

The plan will be submitted to the cabinet by the lord mayor of Newcastle, R. S. Dalgleish, and a deputation of members of parliament and representatives of emigration authorities from all parts of the country. Copies of the statement afterward will be circulated to Dominion premiers, high commissioners and agents-general, with a letter from the lord mayor of Newcastle appealing for their co-operation in an effort to bring about the biggest move ever made for the repopulation of the empire by families and communities from the United Kingdom.

New Gold Strike

Made On North Arm Of Great Slave Lake

Edmonton.—A new gold strike west of Yellowknife by on the north arm of Great Slave lake was revealed to the world when Dr. Fred Jolliffe, of the federal geological survey, flew out of the north after a summer spent in the northwest territories.

"The strike was made September 15 several miles from the Burwash discovery," said Dr. Jolliffe.

He refused to divulge the name of the prospector who made the strike pending the filing of his official report when he returns to department of mines headquarters at Ottawa.

Dr. Jolliffe and his party of 15 student assistants from the University of Alberta, explored an area of roughly 10,000 square miles on the north shore of Great Slave lake and found that 2,800 square miles of the district was underlain by pre-Cambrian sediments and volcanics, relatively favorable for the occurrence of gold and silver deposits.

Dr. Jolliffe left Sept. 24 for Ottawa.

Stage Sham Air Raid

Fleet Of Giant Bombers Visit Island Of Malta

Valetta, Malta.—A fleet of giant bombers and other aircraft dropped over Malta in a sham air raid recently, with this tiny British island outpost plunged in darkness and eerie silence.

Promptly at 9:30 p.m., every house street and traffic light blinked out. Simultaneously, the twinkling lights of British warships riding at anchor in the harbor went out.

Thousands of citizens thronged the historic bastions of Valetta and the seafloor from the raid.

Acting-Governor Luko surveyed the operations. Aerial and military authorities said they were well pleased with the island's loyal co-operation.

Coining Ethiopian Money

Rome.—Italy is already coining Ethiopian thalers, for use following the incursion of Italian forces into Ethiopia. Employees of the mint said the coins are to be used by the military and civil governors which Italy plans to install in Ethiopia, to pay of tribesmen who seek work under Italian domination.

More Wheat In Store

Ottawa.—The Dominion bureau of statistics reported Canadian wheat in store for the week ended Sept. 20 amounted to 220,842,570 bushels, an increase of 13,958,389 over the previous week. The visible supply for the corresponding week last year was 223,490,206 bushels.

A Quiet Session

Prince Edward Island's House Of Assembly Meets

Charlottetown.—Another chapter was written into the history of British parliamentary procedure when Prince Edward Island's House of Assembly, filled with 30 Liberal members, met and carried on the affairs of state without an official opposition.

It was not a house of "yes-men," however. At least two government supporters served notice on Premier Walter Lea that they were not going to be a rubber-stamp for cabinet-directed policies.

When the money bill, the most important legislation of the special one-day session, was being studied in committee under the guidance of the premier, W. H. Dennis, Prince, and H. H. Cox, King's, raised objection to Canada's smallest province providing for \$3,000,000 expenditure to refund loans and carry on public works.

To give the cabinet this authority two months after taking office would be going directly against the policy of retrenchment which placed them in power, the critics contended.

Absence of an official opposing party helped to speed the work of the session and at an early hour the governor, accompanied by his secretary and aide-de-camp, returned to give His Majesty's assent to the bills passed.

The house was prorogued to meet ordinarily in March, 1936.

Abolish Ration System

New Decree Is Effective In Soviet Russia

Moscow.—A government decree abolished the ration system of selling some prime food products, cutting prices in open commercial shops. The decree constitutes an important step toward liquidation of the present double sales system whereby workers make purchases in "closed" ration shops and the general public buys in open shops.

Prices of the two have differed widely, workers getting the benefit of extremely low rates.

The decree abolished ration shop sale of meat, sugar, fish, butter and potatoes and threw all buying of these products into open shops, substituting one fixed price for the previous double price system.

The new price scale reduced beef more than 50 per cent. It now will sell from five rubles up per kilogram. Sugar will be four rubles and 32 kopecks per kilogram as compared with 6.50, and butter was reduced from 24 rubles per kilogram to 15.

To prevent speculation, it was announced, no purchaser will be permitted to buy at one time more than two kilograms of sugar, two of sugar, a half kilogram of butter or three kilograms of fish.

Hours Of Labor Set

Legislation Will Be Brought Into Effect October 5

Ottawa.—Legislation for limitation of the hours of labor in certain industrial undertakings in Canada will be brought into effect on Oct. 5. Regulations for the carrying out of the measure have been drafted.

Based on a 1919 convention of the international labor organization of the League of Nations, the legislation constitutes part of the reform program brought down by the government at the last session of parliament.

Would Defend Record

If Speed Prestige Threatened Campbell Will Race Again

London.—Sir Malcolm Campbell and his blundered are through with breaking records unless some foreigner gives them a new mark to shoot at.

Sir Malcolm announced at a dinner in his honor that he had had his fill of blistering speeds, but that there was still a great deal of lightning in his racing car that might be coaxed out if Britain's speed prestige was threatened.

Another Leaf Competition

Montreal.—Third annual competition for the most beautiful autumn tinted maple leaf is announced by the Canadian government through the Canadian travel bureau. First prize will be \$100.

FILIPINO PRESIDENT

By an overwhelming majority, Senator Manuel Quezon, above, was elected first President of the new Philippines Commonwealth. Vice-President Garner, of the United States, will attend the inauguration exercises on November 15, when Quezon will take office for six years.

The Federal Vote

Results Should Be Quickly Available After Closing Of Polls

Ottawa.—Although various adaptations of proportional representation and the single transferable vote are used in some provincial elections the Dominion general election Oct. 14 will be conducted on the traditional single-vote system.

Election will have only one choice between the contending candidates. They will mark an "X" opposite the name of the candidate they favor and the candidate with the largest number of "X's" will be elected. There are no second or third choices.

With the single-vote system in operation throughout the Dominion on election day results will be available probably for all constituencies within a few hours of the closing of the polls.

Another Storm Hits Japan

Typhoon Kills 48 And About 100 Are Missing

Tokyo.—A typhoon which whirled fearfully and destructively across Japan, from Kagoshima to Wensai, killed at least 48 persons, and about 100 were missing.

Several ports in the inland sea reported that fishing craft were missing, and the steamer Tonggama Maru, with a crew of 13 and 19 passengers, also was missing.

The typhoon was the fifth death-dealing storm in three months over Japan proper.

Installing McGill Principal

Montreal.—It is expected at least 24 Canadian universities and colleges will be represented at the installation of Professor A. E. Morgan as principal of McGill University Oct. 5. Dr. Robert C. Wallace, president of University of Alberta, Edmonton, will be in attendance.

RECEIVING THE KING'S CUP

Pilot T. Rose, driving a Miles Falcon machine, won the King's Cup Air Race "round the British Isles" this year, and is shown receiving the coveted trophy from the hands of Sir Philip Cunliffe-Lister.

Farewell Banquet

Governor-General And Countess Of Beasborough Are Honored

Ottawa.—A farewell banquet was given by the government of Canada to the Governor-General and Countess of Beasborough.

The term of office of the Earl of Beasborough as the king's representative in Canada expires shortly.

It was an affectionate farewell at which, in addition to Sir George Perley, who presided, there was a distinguished gathering of representatives of the state, the diplomatic corps, the church, the judiciary and the civil service with their wives.

Responding to the toast proposed by Sir George Perley, the governor-general dwelt on the happy relations he had enjoyed during his four years in Canada.

Veregin Resigns

No Longer Head Of Brotherhood Of Doukhobors

Saskatoon.—Peter Veregin, for 10 years president of the Christian Community of the Universal Brotherhood of Doukhobors in Canada, stated here that he had severed all connection with the community. He declared that he stood now as a private Canadian citizen. He had no intention of leaving the country, he said.

Mr. Veregin, who has been virtual ruler of the sect in Canada since the death of his father in a British Columbia railway accident, said he had tendered his resignation about six months ago. He would not disclose any reason for his action. He is now on his way to Montreal.

Honesty Was Rewarded

Delivery Boy Returns Valuable Bonds And Gets Good Job

New York.—From the lowly plane of delivery boy of "coffee and—" at \$3.15 a week, young Albert Corrieri vaulted to a remunerative position in Wall street.

Corrieri's role in "the streets" newest success story was cast when he picked from the gutter a packet of bonds valued at \$150,000 and returned them to the owners, C. F. Grunwald, vice-president of C. F. Childs and Co., Wall street brokers, owners of the bonds, announced Corrieri would start work in the cashier's department of the brokerage firm.

Corrieri, who is 22, may also get a reward.

Siege Of Lucknow

Ten People Alive To Celebrate Thrilling Event

London.—Ten people in different parts of the world celebrate one of the most thrilling incidents in the modern history of the British Empire, the siege of Lucknow in the Indian mutiny.

The oldest survivor of the siege is C. G. Palmer, a resident of British Columbia; the youngest Arthur Dashwood, 78, living in London. Dashwood's mother gave him birth in the residency at Lucknow, where 17 people were herded in one room during the siege. Despite her ordeal, Mrs. Dashwood lived for more than 70 years.

TO STRENGTHEN NAVY AND AIR FORCE IN BRITAIN

London.—Prime Minister Baldwin intends to outline measures to strengthen both the navy and the air force when he addresses the Conservative party at its annual conference at Bournemouth.

George Lansbury, Labor leader in the House of Commons in an address declared Britain and other nations were on the brink of a war in which it would be "Christian against Christian, Mohammedan against Mohammedan, Jew against Jew—all praying to the same God for Victory."

"I cannot bow to that sort of thing," the leader said. "The way out is for some nation, and I want it to be Britain, to blaze a new trail."

Athens.—The semi-official Athens news agency announced information from a German source indicated arrangements had been completed at Istanbul for Greek and Turkish warships and planes to start manoeuvres in the Dardanelles and that two Roumanian torpedo boats would also participate.

It has been reported Greece is prepared to support Great Britain in any Mediterranean activity which might become necessary at the outbreak of Italo-Ethiopian warfare.

Greek newspapers hailed the arrival of British ships in Greek ports, saying that the people of Greece have come to regard the annual British naval manoeuvres in Mediterranean waters as a welcome tradition.

Mussolini Opposed

Report From Italy Of Some Opposition To War Plans

Paris.—French newspapers reprinted a story from The London Referee saying Prince Umberto, heir to the Italian throne, is opposed to Premier Benito Mussolini's conflict with Ethiopia.

(This report was described as utterly false in Rome and London by authoritative Italian spokesmen.)

There is a possibility, the story said, of General Iulio Balbo, governor of Libya and Italian air hero, leading a revolt against Il Duce. "Balbo, whose relations with the royal family are excellent, is also opposed to the Ethiopian campaign," the story asserted. "A large number of Italian superior officers share his view."

Sentry Killed By Lions

Five Belonging To Emperor Salasle Make Dash For Freedom

Add's Ababa.—Five of Emperor Haile Selassie's high lions escaped, killed one sentry, and injured five more.

In this rush for freedom they devoured several of the Emperor's pedigreed Australian sheep and killed two horses.

Colonel Mekouria, the commander of the imperial guard, seized a machine gun and shot all five beasts in succession.

Insurance Premiums Higher

British Vessels Passing Through Suez Canal Must Pay More

Singapore.—Fear of trouble developing in the Mediterranean was reflected here when marine insurance companies warned special premiums for "war risks" must be paid by British vessels returning to England through the Suez canal.

To escape payment of the war risk premiums British ships must go all the way around the Cape of Good Hope.

Gordon Bennett Trophy

Warsaw.—The Polish balloon Polonia was awarded the Gordon Bennett trophy as the winner of the 27th Bennett international races that began here Sep. 15. The Polonia, one of the 18 entries, travelled about 1,007 miles after a flight of 58 hours and 54 minutes, it was officially announced. It reached an altitude of 16,732 feet. Another Polish balloon, the Warsaw, was second.

STONY PLAIN SUN.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, Oct. 3, 1935.

Advertising Rates:

Display, 40 cents per column inch plate, 25c per column inch. Readers in Local, 15c line. Legal and Municipal Notices, etc., 15c line first insertion; 10c line each subsequent insertion.

Assisting in Other Ridings.

The Hon. Charles Stewart regrets that it may be impossible for him to address a meeting in Stony Plain during this campaign. As Mr Stewart is the only Liberal ex-cabinet minister in the province, he has freely been giving his time to assist candidates in other ridings, which makes it impossible for him to cover the whole of Jasper-Edson riding. As Mr Stewart has spoken on a number of occasions at Stony Plain, it was felt that he should spend what time he has at points where he has not spoken before. He sincerely hopes that his Stony Plain friends will realise his position, and will read the Liberal literature and tune in when he speaks over the radio.

"Dave" Bell Buried.

David T. Bell, of Spruce Grove, passed away at an Edmonton hospital on Friday, 27th of Sept., at the age of 47 years. Mr Bell had been the pioneer garageman at the Grove, and was known to a large number of motorists who traveled Jasper Highway.

He is survived by his wife; 3 daughters, Virginia, Eileen, and Iris, all of Edmonton; his mother, Mrs Thos. Bell; and 1 brother, George, both of Glanford, Ont.

The funeral service was held Monday Aft. Rev C G Stone, pastor of the First Baptist church, Edmonton, conducted the service, and interment was made in Edmonton cemetery.

A large number of deceased's friends at Spruce Grove and district were present, to pay their last respects.

Open Seasons for Game.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr and Mrs R B Baoukes Edmonton, were Sunday visitors with friends in Stony.

Miss Muriel Michael, Edmonton, spent Sunday at her home here.

The Comisarow family spent the week end in Edmonton, while engaged in Yom Kippur celebration.

Miss Marie Gannon has been taken to a hospital in Calgary, for treatment.

Mr G Clarke left on Friday for Hinton.

Mr and Mrs H W Dodge, Edmonton, were Sunday visitors with Mr and Mrs Malloch.

The sale of the H T Walton acreage on North Main St. to Mr Gannon is reported.

Rev. Alfred F. Miller left on Friday for Canrose.

Good progress is being made on the construction of the new residence on Third ave. for Mr Zilliox.

Town Council holds its regular meeting in the town hall tonight, the 3rd.

Some further improvements on Main St. will shortly be under way, as it is said to be the intention to "build an addition to the old Massey-Harris agency office, to be used as a restaurant.

The week commencing Sunday next, October 6 has been proclaimed "Fire Prevention Week." The local fire and light committee intend making an inspection of all premises, for the purpose of seeing the fire regulations are carried out.

BUTTER AND EGGS WANTED at The Royal Cafe.

Card of Thanks.

Mrs. W. L. Hodgson and Family wish to thank their friends for the many kindnesses and expressions of sympathy given, on the occasion of their recent sad bereavement.

Miller-Coates.

A charming wedding was solemnized in the vestry of the First Baptist church, 102d St. and 102d Av., Edmonton, on Tues, Oct. 1st, when Miss Eunice Coates, daughter of Mr and Mrs James Coates of Duffield district, became the bride of Mr L. Miller of Stony Plain. The officiating clergyman was Rev C G Stone, the pastor.

The couple will take up their residence on Fourth av. on the return from the honeymoon.

Invention Wanted.

Ducks are coming in quite plentiful the last few days; in fact we have been presented with a couple of brace. If someone would invent a gun which would shoot the feathers off ducks, and the inside out of 'em, it would be much more convenient!—Saxsmith item a Grande Prairie Tribune.

Not to Oppose UFA.

Hon. H. H. Stevens's New Construction Party will not oppose the UFA candidates in constituencies where the United Farmers are already represented. It will support them.

Movie Picture, Oct. 12.

Movie-picture fans have a treat in store for them when Mr Sturmer will be bringing another of his special German pictures to Kelly's Hall on Saturday, Oct. 5, at 8 p.m. This picture is entitled "Das Maedel von der Resperbahn" (The Girl from the Resperbahn). This picture is an agreeable German talking and singing production made abroad. Clear story and songs give it fair appeal.

The Wheat Carryover.

It now seems fairly well established that the current crop year will see the world wheat situation back to a normal state. Crop damage has cut yields to such an extent that the world carryover will likely be down to 500 million bush. by Aug. 1, 1936. This can be considered normal. During the depression the world carryover reached as high as 1,100,000,000 bu.

Canada is now the only country in the world with an abnormal carryover. This is likely to be corrected before next summer.

Insofar as supply and demand is concerned the wheat situation is now on a sounder basis than at any time since 1927.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path. Adams Tubbs had told her to follow. A truck comes along the road driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adams tells Nancy that her brother Luke has broken his leg, and that Jack Nelson has been hired to help while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adams go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and later Matthew if he knows why. He said: Let's go in and see. Then Nancy Adams that she is having her debut ball in a different setting than had been planned for her in Boston.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adams paid a sign for the library, and the Adams boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthew's uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard.

Now Go On With The Story

CHAPTER XVIII—Continued

Where that empty milk can came from they never knew; but for a while it warmed not only diversion, but a feeble warmth that was dearly welcome. With the aid of a pocket knife Jack ripped the leather covering from the seat, and used excruciating stuffing for a fire. School books

came next, but not until darkness was descending and all hope of seeing the missing driver was given up.

"I'd go for help," Jack told his sister grimly, "but even if the road weren't drifted, I'd never make it with night coming on." "We've been here about four hours, haven't we?" It seems a lifetime already, and the youngsters have been here a good while longer. If things aren't better in the morning I'll have to go, Nance. Have you noticed" (he lowered his voice), "those twins are getting drowsy, both of 'em? With o's Paul Evans. I can't tell whether they're just sleepy, or— Look here, sis! It's up to us to keep them moving!"

Darkness came fast; but slowly, terribly slowly, it seemed to Nance hour after hopeless hour dragged on. Wild wind still raged about them, and at the back of the bus a snow-drift had collected, lifting in through the broken window and making their cramped space smaller still. Though all worked desperately to keep the fire burning, a sudden, especially fierce gust had blown it out; and there were no more matches. Jack had long since relinquished his sheepskin jacket, and Nancy's knitted skirt was pinned securely about a shivering boy.

Pretense at games—prancing up and down the aisle—anything to keep blood circulating in those small cold kiddies, was kept up valiantly; but as night descended the children who were not crying had dropped asleep, huddled together in a corner, and tears of fright and pity dimmed Nancy's eyes as she looked down at them.

Through that interminable night a grim and silent Jack kept moving constantly, stopping at every turn to rub the legs or arms of some small sleeper. Nancy, exhausted, sat for a time, holding within her coat a boy of seven who whined with the cold. Later, when a semblance of warmth returned to him and he dropped asleep, she too arose to move about the crowded quarters, and like her brother, chafe numb hands and feet.

Dawn came at last, and the storm had not abated.

"But, we're alive," said Nance, teeth chattering as she tried to speak. "We're all alive."

Jack faced her suddenly. Almost he seemed that he was angry. "And how long will we last? How long, I ask you?" He raised a foot and she saw a bare leg above the shoe. "I put my socks on Joey Miller three hours ago when you were nodding. They're all in, Nancy; and some of these little girls won't live the day through unless help reaches us. If we had food it might put new life into them; but every lunch pail's empty and—"

"He stopped, and if, upon closer examination in the huddled mass, and lifting a child, worked at her stiff legs in desperation. It was, Nance saw, the twin who wore her sweater; and suddenly the girl was pulling off her woolen stockings while Jack protested: "You sleep those on, sis! Say, are you going crazy? Do you want to freeze to death? You're in your thin silk undies now. I know it. I saw you sneeze out of that knitted thing a while ago. Damn you, Nance Nelson, you keep those stockings on!"

Nancy said nothing. Jack was, she understood, half crazed with anxiety for all those helpless children and herself as well. Slipping bare feet into her shoes again, she knelt to put warm hose over the icy legs of the small sufferer; while one of the girls, watching in silence, struggled out of her coat and buttoned it about her little sister.

Nance threw her a smile, a drawn, pale smile that Cousin Columbine wouldn't have recognized.

"Come help me, Evelyn," she said gently. "We must wake some of the little ones and keep them moving."

One after another they got them to their feet, these weary youngsters, some, unable to understand, protested, weeping. Others did their brave best to help. It was nearly noon when, as the wind subsided, Jack said the words that struck terror to his sister's heart.

"I'm going now, Nancy." His voice trembled a little. "As I see it, there's no other way. Keep up your courage; and for God's sake, Nance, keep fighting. Unless the wind starts up again I'll reach that ranch in a few hours."

"And—if you don't!" 218

AIR CELL battery lives on air for 1000 hours..

Here is the "A" battery which has revolutionized the radio industry. It is making the battery set as efficient and as simple to operate as an electric receiver.

Eveready Air Cell needs no recharging. It energizes itself by "breathing" oxygen—it literally "lives on air" for 1000 playing hours.

With the Air Cell there is no gradual stacking of power which so often spoils radio reception. It maintains itself at full strength to the end.

Don't envy your city friends who have electrically operated radio sets. Now you can have the same clear reception with no trouble or bother. That is, if you buy a new Air Cell Radio.

These new sets, now made by all Canadian radio manufacturers, use the Eveready Air Cell "A" battery which does away with storage batteries and needs no recharging.

The amazingly long life of the Air Cell—with no upkeep costs—gives you true economy.

Eveready Layerbilt "B" Battery is the ideal companion.

Their eyes met, and Nance knew her brother realized, how slim a chance he had. Her lips trembled; but he made a gesture toward the children.

"I know—but I can't let them die, Nancy, while there's a chance to save them. Bill" (turning to the boy who wore his jacket), "I'm going for help and it looks as if I'd have to take that coat. No, I won't need the socks" (as the little boy stopped bravely to remove them). "Tom Osgood, you keep the kiddies moving. I'm counting on you older ones to help."

"Look here," spoke up the boy suddenly, "you find a fence, Jack, and follow it if you can. Dad told me once that if ever I got caught out in a blizzard, to find a fence and just hang on to it. And if you run into a mail box you'll know a gate is somewhere near. Gosh! Jack, I—I norter wish you wouldn't go."

Jack forced a smile.

"Now don't you worry, sis. I'll get there sure, so long as the wind stays quiet. You just help Nancy every way you can; and whatever happens, don't go to sleep. Keep thinking that by night we'll be safe home. Good—good—bye—every one."

He did not look at Nancy as he strode away. The girl knew that he did not dare to, and in another moment his tall form was blotted out. What fate would meet him, alone on those terrifying plains, she wondered, tears stinging her eyelids. And (with a clutch of fear), was the wind rising?

It seemed unending. The dreaded wind died down, returned, and died again, not to return. No one could say just when the blizzard ceased, for one by one the children were succumbing to the portentous drowsiness. Once Nance succumbed herself, to be aroused by the frantic, pounding fists of Tommy Osgood.

The cold was still intense when that second dusk approached the prairies; but the whimpering voices were hushed in an ominous silence. Most of the children had given up by now, completely spent with cold, and hunger, and even fright. For there had been strange happenings since Jack's departure. Twice they rejoiced at the sound of approaching horses, only to find that these ears must have deceived them. Two of the children had "seen" the school-house, and, as the mirage faded, burst into tears of disappointment. Working courageously on icy arms and legs, Nance knew, a sense of terror creeping through her, that she was giving out. Her eyelids kept closing against her will. At times it

seemed impossible to drag them open. Her hands were numb; her bare legs curiously lifeless.

(To Be Continued)

A Clever Photographer

Had Brilliant Idea When His Mistake Customer's Address

A young man living at Weingarten, in Wurttemberg, had himself photographed, but the photographer mislaid the address, to which the photograph should have been forwarded. What was the photographer to do? He stuck a proof of the photo on the outside of the envelope and added the words "To this gentleman in Weingarten." The photographs reached their correct destination safely.

Making Accurate Clock

What is claimed to be the most accurate clock in the world—one that will not vary more than one quarter of a second in a year—is being made by a London firm for presentation to Greenwich Observatory.

Quick Relief FOR STUFFY HEAD

Just a few drops... and you breathe easily again! Va-tro-nol clears clogging mucus, reduces swollen membranes—brings welcome relief.

Used in Time, Helps Prevent Many Colds

A FUNDAMENTAL PRINCIPLE.

Since the earliest days of civilisation records reveal that innumerable attempts have been made to control price, production and distribution of such products as sugar, coffee, cotton, wheat, silk, tin, pepper, and over 200 other commodities, all of which have been tabulated, to control price, production and distribution. Without exception, these attempts have all failed, and the only really astonishing thing to be recorded is the persistence of some minds which, while admitting that efforts in the past have not succeeded, think that their own particular latest effort, of course, will be successful, for the reason they invariably but naively state: "Times and conditions are now different." As a famous philosopher once reminded us: "History teaches us but one lesson, that men learn nothing from history."

Practically all the attempts that have been made in the past with every conceivable product have failed for one very simple reason, which is that while man can set a price for any product, and while occasionally man has been successful in controlling production and distribution as well, yet no regulation, it seems, made by man has the slightest effect upon obliging the people of the world to purchase the planned product at the set price. This obstinacy of the housewives of the world in their refusal to purchase at a dictated price is the rock upon which all the plans eventually founder, sadly enough, however, usually bringing with their failures loss to taxpayers, inconvenience to consumers, and always distress, sometimes actual disaster to producers, for usually producers, with the hope of higher prices as promised by the plan and in the hope of increasing income, increase acreage and production.

That the demand for any commodity will slip away and decrease as price or production is artificially interfered with, can be stated to be a fundamental principle but which, unfortunately, is little recognised by ardent planners.—Searle Grain Co. Bulletin.

SPECIAL GERMAN PICTURES.

'Das Maedel von der Reeperbahn'

(THE GIRL FROM THE REEPERBAHN)
WILL BE SHOWN IN

Kelly's Hall, Saturday, Oct. 12.

At 8 o'clock in the Evening.

Canadian National Railways

Rt. Hon. R. B. Bennett, P.C.

Mr. Bennett is seeking re-election in his old constituency of West Calgary, and is being opposed "I admit frankly," said Mr. Bennett, "at his own nomination meeting in West Calgary. I would hate to think that, nearing the end of a long career, I would be rejected by those among whom I have lived, struggled and toiled for so many years."

New Time Table for Mails.

A change has been made in the mail service to Stony Plain Post-office.

Mails from the East now arrive here on Sunday, Tues. Thurs. at 1.32 p.m.

Mails from the West arrive here on Sunday, Wed. and Friday at 6.23 p.m.

Mail for the East must be posted before 6 p.m. Mail for West must be posted before 1 p.m.

No change has been made in the running time of the "Trans-continental Trains No. 1 and No. 2."

Polling Hours on Oct. 14.

Polls for the general elections in the Dominion on Monday, October 14, will open at 8 a.m. local Standard time and close at 6 p.m. As there are 4 different times across Canada, polls on the Atlantic coast will open and close somewhat of polls on the Pacific coast.

Trap-shooting by Floodlight.

If investigations now being conducted by the Hockey (Ontario) Rod & Gun Club continue successfully Shoot and Trap Shooting by floodlight may become a popular evening pastime.

Shooting under arc lamps has already been tried in Canada, and officials of the club are now going into the question of this improved form of night shooting which has been successfully launched in the U.S. notably at Atlantic City, N. J.

White birds are used instead of black, and those who have shot by floodlight prefer it to shooting by daylight.

Schools Re-open.

The ban has been lifted, and all local schools re opened their doors on Monday. The members of the local Board of Health wish to express their appreciation of the way in which the public has co-operated during this period, and it is sincerely hoped the community will continue free of any epidemic.

On the Side.

There seems to be a plethora of gente who wish to bring a higher standard of living to "the common people," particularly if the aforesaid gente are hunting votes. Here's Mr. Gerard, who's fighting to retain his seat for Bow River, who advocates the paying of national dividends to families whose incomes were less than \$1285.

A sermon they couldn't broadcast was given recently in a church in England. This was in the sign language, and was the first ever held there for the deaf. There was a congregation of 700.

Isn't some chaps optimistic? Here's the Lac La Poudre farmer who told the Farmers' Creditors' Arrangements review board last week that he will be in a position to make better payments on his debt of \$5500 "when social credit dividends begin to come in." There will then be \$100 a month coming to his family, he said. Well, supposing the Misqu, wants to use his \$5000 for some other purpose than applying it on Hubby's bad debts?
